Language and Learning Foundation

EDUCATION NON-PROFIT · INDIA

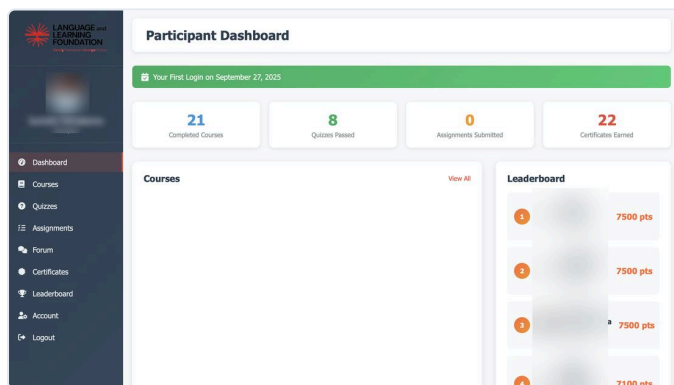

Custom Moodle LMS with purpose-built learner dashboards and a state and district reporting system.

A teacher-training programme running across several Indian states, where the reporting Moodle ships with could not answer the questions the programme actually needed to ask. The work went well past configuration into custom development, and it continues as an ongoing engagement.

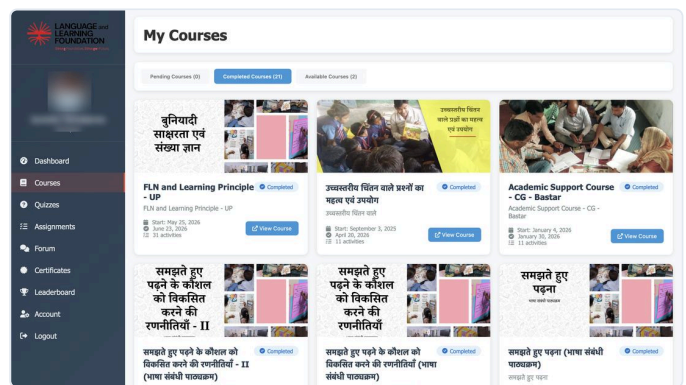

WHAT THE WORK INVOLVED

- Custom participant dashboard showing completed courses, quizzes passed, assignments submitted and certificates earned at a glance
- Custom course dashboard splitting pending, completed and available courses
- Custom quiz dashboard with per-attempt scores, pass status and due dates
- Certificate tracking and a points-based leaderboard
- State-wise and district-wise completion reporting
- Mentor reporting dashboard covering per-participant activity completion, marks, attempts and last access
- Excel export on every report
- Ongoing custom feature development and Moodle consultancy

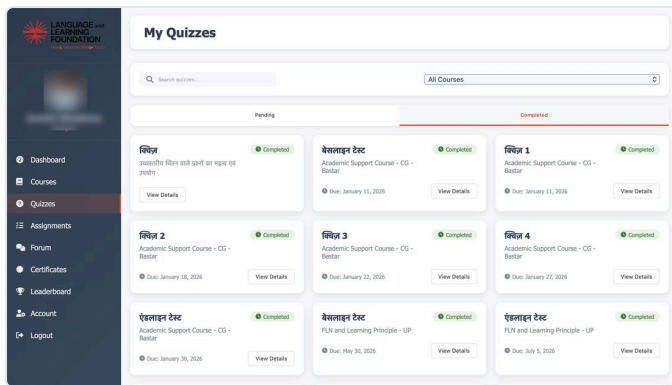

Learner and teacher names are blurred in these screenshots. The programme data belongs to the client and the people in it, not to a marketing page.

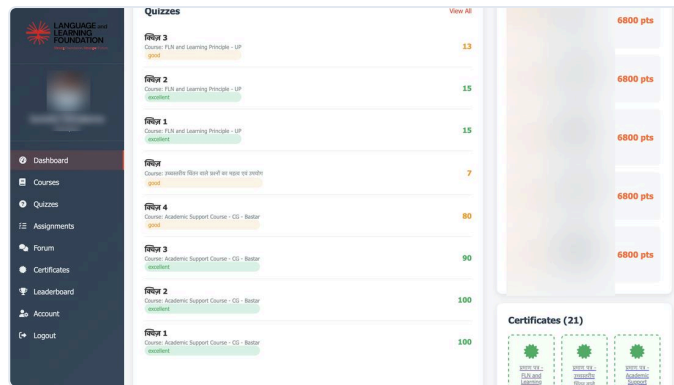

Custom participant dashboard: course, quiz, assignment and certificate counts, with a leaderboard

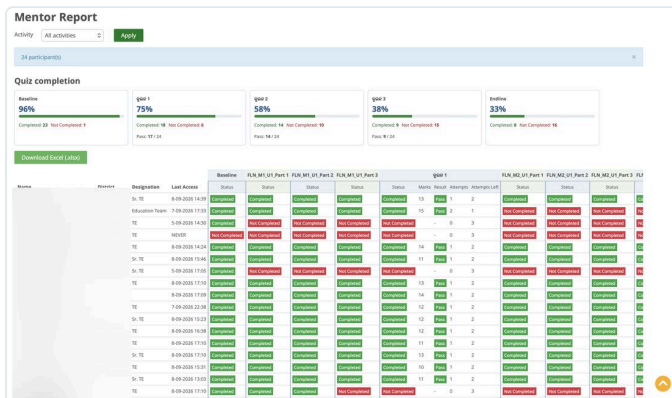

Custom course dashboard separating pending, completed and available courses

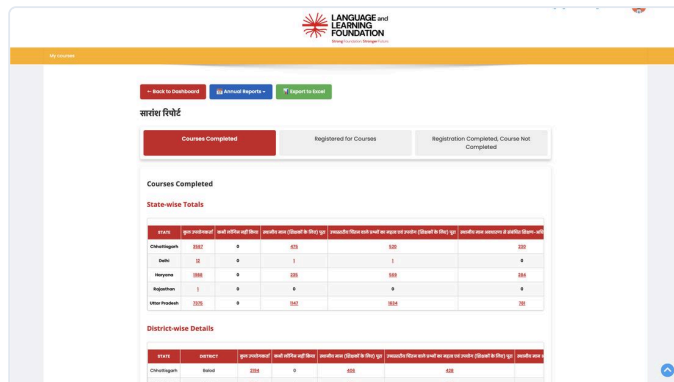

Custom quiz dashboard with completion state and due dates per course

Quiz results, leaderboard standings and earned certificates

Mentor report: quiz completion rates per module with per-participant detail and Excel export

State-wise and district-wise completion reporting, exportable to Excel

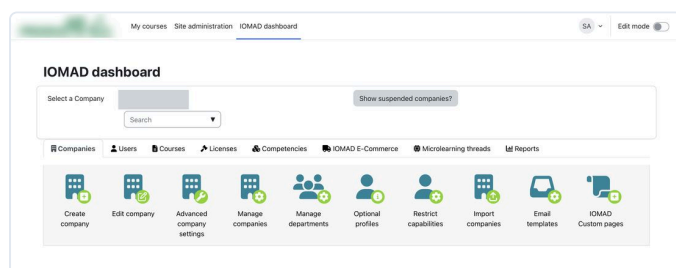

Multi-tenant IOMAD platform built, launched and maintained for a training provider that delivers courses to other companies.

PositiveMatters builds and delivers training for other organisations, which is the situation IOMAD exists for: one platform, many client companies, each seeing only its own learners, courses and reporting. The course catalogue covers Drugs and Alcohol Awareness, Customer Collection Officer, Rail Collection Officer and PM Network Collection Officer. The platform runs at learning.positivematters.co.uk.

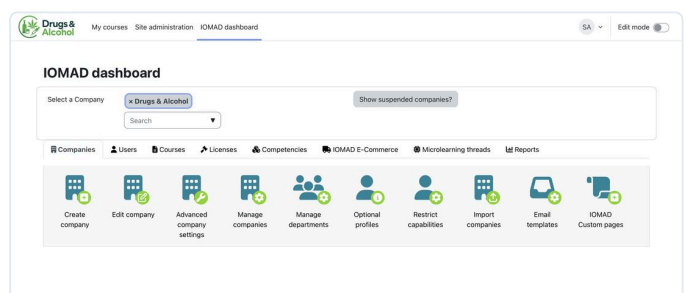

WHAT THE WORK INVOLVED

- Built the platform from scratch: IOMAD installation, configuration and launch
- Company and department structure, so each client organisation is separated from the others
- Per-tenant branding, so each company sees its own logo and identity on the platform
- Licence allocation, controlling how many seats each company holds on each course
- Company-scoped reporting: completion by course and by month, attendance, licence allocation and user login reports
- User management across tenants, including bulk upload and assignment to companies
- Course setup and assignment to companies, with company groups and learning paths
- Custom plugin: Company Login Link (`local_companyloginlink`), giving each tenant company its own branded entry point to the platform, with the supporting changes made in the IOMAD codebase itself
- Ongoing development and platform management

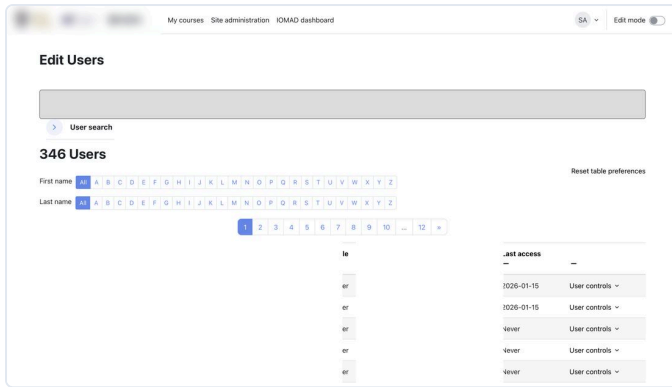

Tenant company names, logos and all learner details are removed from these screenshots. The tenants are the client's own customers and the learners are their staff, so neither is ours to publish.

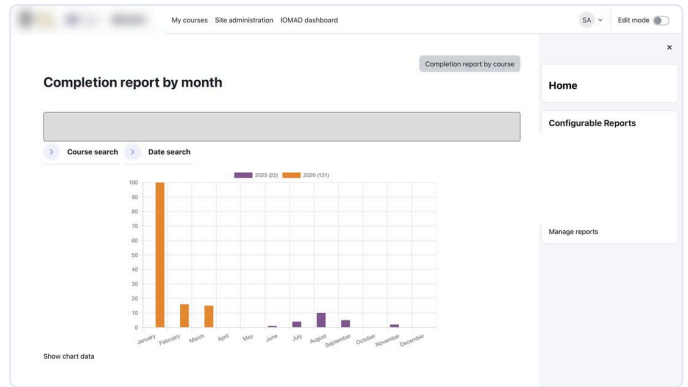

Per-tenant branding: selecting a company swaps the platform logo to that company's own

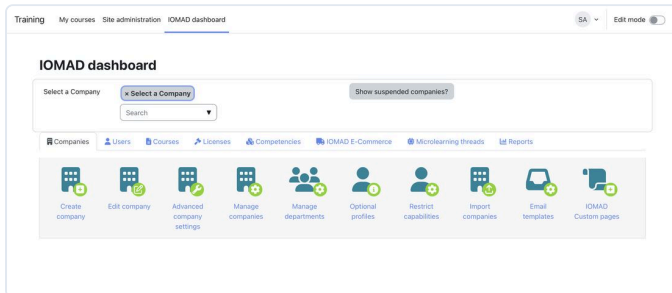

A second tenant selected, showing the branding change applied across the platform

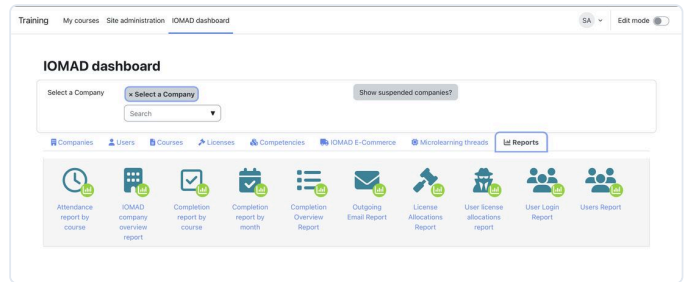

A single tenant with 346 learners, filtered and paginated, with last-access tracking

Company-scoped completion reporting by month, with per-client configurable reports

IOMAD company administration: creating companies, departments, optional profiles and per-company capability restrictions

Company-scoped reporting: completion, attendance, licence allocation and login reports

Company Login Link, a custom plugin written for this platform, installed and running as an additional plugin

Dr. Carl Balita Review Center

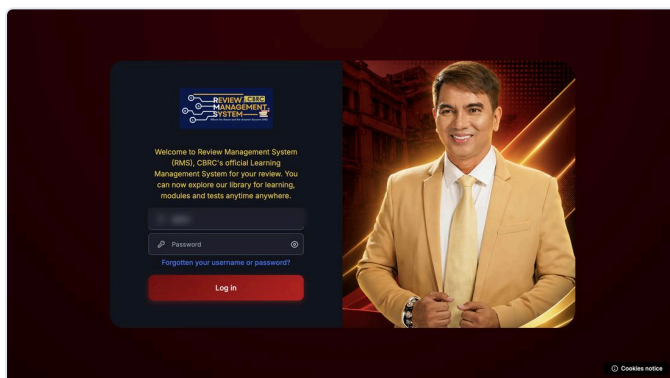

PROFESSIONAL EXAM REVIEW · PHILIPPINES

Heavily customised Moodle for a national licensure review centre, with ongoing development.

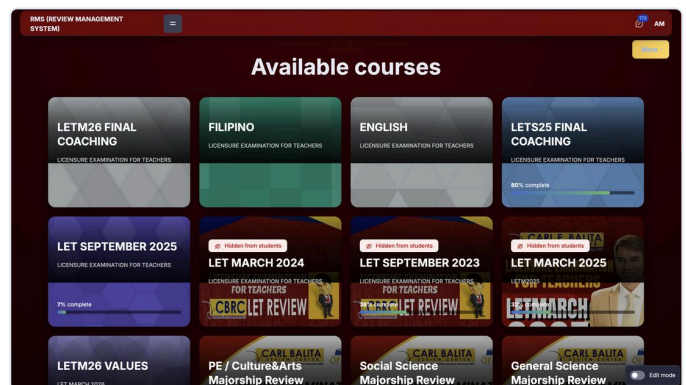

A review management system for teacher licensure preparation. The brief was a platform that does not look or behave like stock Moodle, which meant theme and interface work rather than settings changes.

WHAT THE WORK INVOLVED

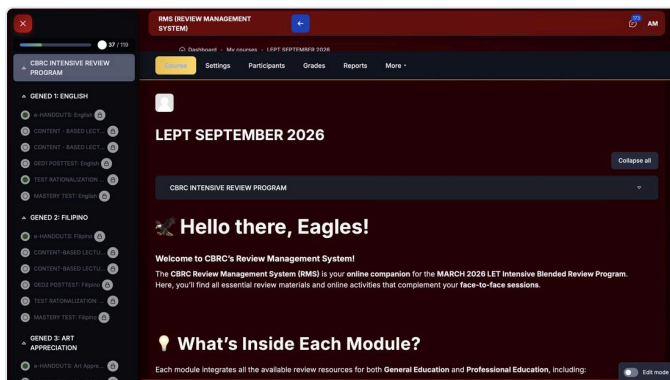

- Custom branding and a dark visual theme across the whole platform
- Custom login page built around the centre's identity
- Course catalogue presentation with progress indicators
- Structured left-hand course navigation for long multi-module programmes
- Learner experience improvements throughout
- Ongoing Moodle support and new feature development to client requirements

Custom login page, built to the review centre's branding

Course catalogue with per-course progress

Structured module navigation inside a multi-part review programme

Public-facing course listing on the branded platform

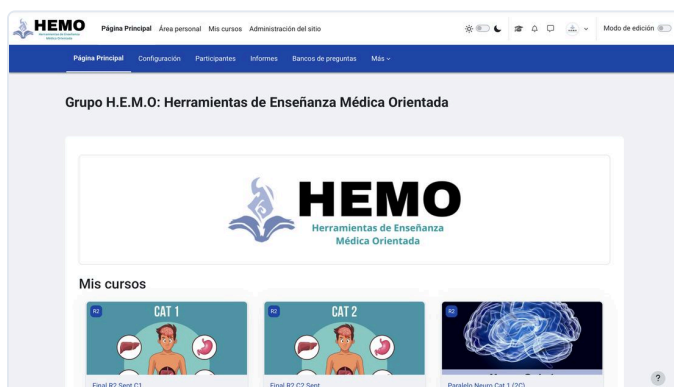

Spanish-language medical Moodle with a custom plugin that watermarks externally hosted video per viewer.

Medical training delivered largely through video, hosted externally on Bunny Stream rather than inside Moodle. The client needed the video to carry an identifying mark tied to whoever was watching it, which no existing plugin did.

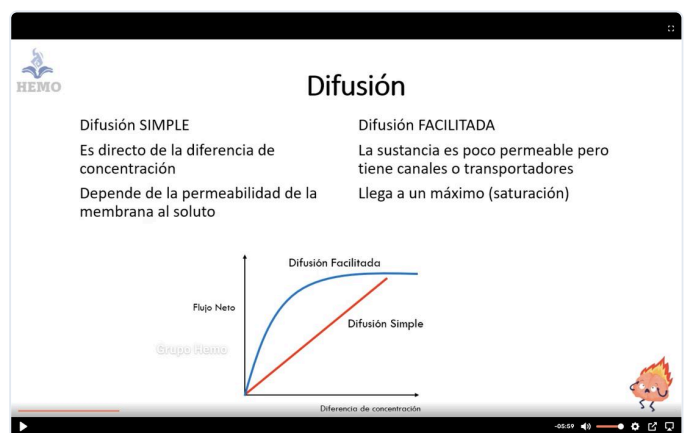

Custom plugin development, not configuration. The watermark is generated per viewer and composited over video served from a third-party CDN.

WHAT THE WORK INVOLVED

- Moodle setup and customisation for Spanish-language delivery
- Bunny Stream integration for externally hosted video
- Custom Moodle plugin applying a dynamic, user-specific watermark over video playback
- Watermarking intended to discourage screen recording and redistribution
- Branded medical course environment

Branded Spanish-language Moodle with the course catalogue

Bunny Stream video playing inside Moodle with the dynamic watermark overlay

Emergency Services Academy and Alberta College of Paramedics

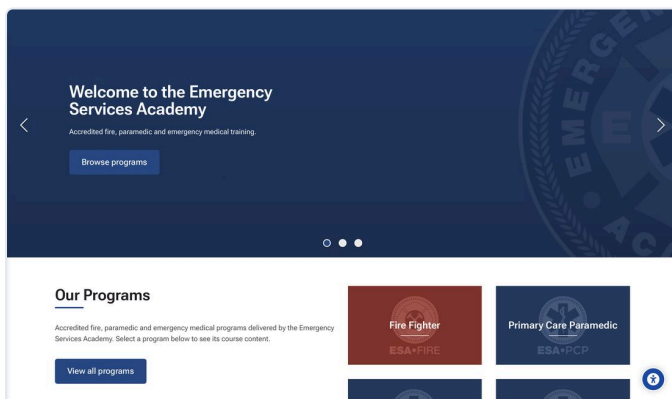

HEALTHCARE AND EMERGENCY TRAINING · CANADA

Accredited paramedic, fire and emergency medical training platforms, including LMS accessibility work.

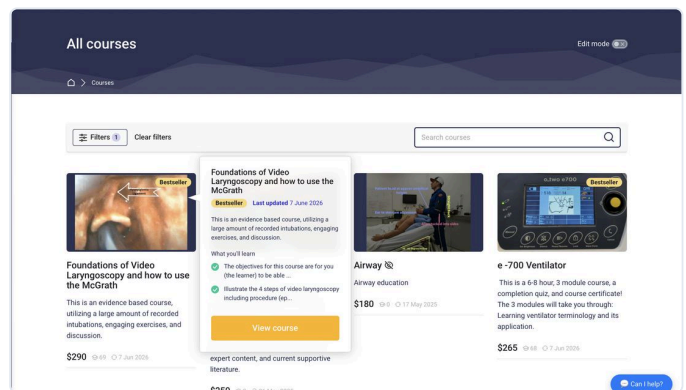

Professional training platforms where the learners are working clinicians and the courses are accredited. Presentation, navigation and accessibility all carry more weight than they would on a general-purpose site.

WHAT THE WORK INVOLVED

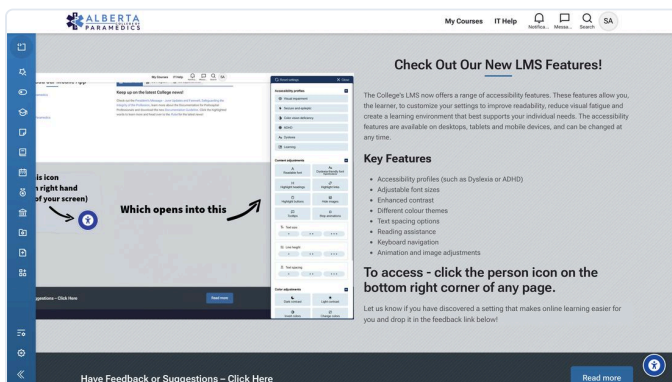

- Moodle setup and configuration for accredited programme delivery
- Institutional branding and custom homepages
- Course catalogue presentation with paid course listings
- Learner navigation and programme structure
- LMS accessibility features: accessibility profiles, adjustable text, contrast and colour themes, reading assistance, keyboard navigation
- Ongoing Moodle support and customisation

Emergency Services Academy: branded homepage with programme routing

Course catalogue with pricing and enrolment counts

Alberta College of Paramedics: LMS accessibility features and learner guidance

Corporate Moodle built around the client's brand rather than around Moodle's defaults.

A human-skills programme delivered as interactive micro modules with personalised certificates. The platform had to read as the client's own product, not as a themed Moodle install.

WHAT THE WORK INVOLVED

- Moodle setup and configuration
- Corporate branding and colour system
- Custom homepage and landing content
- Branded navigation
- Course presentation and learner-facing experience

Branded corporate homepage with custom typography and course routing

Ingenium and IgnitED Learning Hub

EARLY YEARS EDUCATION · INDIA

Moodle and WordPress working as one learning ecosystem, connected with Edwiser.

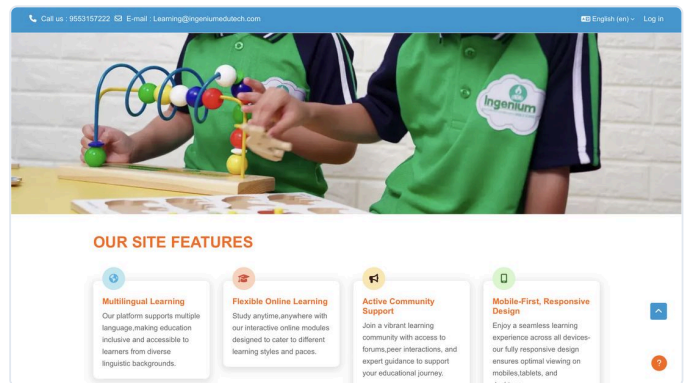

A public-facing marketing site and a Moodle learning platform that needed to behave like a single product to the visitor. The integration work matters more here than either system on its own.

WHAT THE WORK INVOLVED

- Moodle configuration and branded learner experience
- WordPress integration
- Edwiser integration between WordPress and Moodle
- Public-facing training website with responsive design
- Custom homepage sections and multilingual course access

Public-facing IgnitED Learning Hub website

Branded Moodle homepage with the site feature set

dnata, London

CORPORATE, INTERNAL TRAINING · UNITED KINGDOM

Internal employee training LMS, delivered in partnership with Shiksak.

An internal Moodle for employee training: course delivery, user management and the role structure a corporate learning function needs. Delivered in partnership with Shiksak.

WHAT THE WORK INVOLVED

- Moodle LMS setup for internal employee training
- Course delivery configuration
- User management and corporate role structure

LIBA, Chennai

HIGHER EDUCATION · INDIA

Moodle implementation for a business school, delivered in partnership with Shiksak.

A Moodle platform for an established business school, covering setup, configuration and deployment support. Delivered in partnership with Shiksak.

WHAT THE WORK INVOLVED

- Moodle platform setup and LMS configuration
- Institutional learning environment
- Deployment support and configuration to requirement

Custom EdTech platform development at oswaal.ai for an established Indian education publisher.

Development of the custom oswaal.ai platform for one of India's larger educational publishers. This is custom web and EdTech work rather than Moodle. The publisher also runs a separate long-standing Moodle system used by teachers for question banks and existing workflows.

WHAT THE WORK INVOLVED

- Development of the custom oswaal.ai platform
- Custom web development beyond Moodle
- Work within a broader digital learning ecosystem

Capabilities

MOODLE IMPLEMENTATION

- Moodle and IOMAD installation
- LEMP server setup, SSL, cron and SMTP
- Moodle mobile app configuration
- Performance tuning and security hardening

CUSTOM DEVELOPMENT

- Participant, course and quiz dashboards
- Custom reports and mentor reporting
- Excel export
- Custom Moodle plugins

INTEGRATIONS

- WordPress and Edwiser
- Bunny Stream and external video
- Single sign-on
- SMTP and external services

WORKING ARRANGEMENT

Currently engaged on a monthly basis with organisations in India, Canada, Switzerland and the Philippines, covering Moodle administration, custom development, reporting, integrations, upgrades, server management and ongoing feature work. Engagements also come through Fiverr, where 600 orders have been completed and more than 350 carry a public review, and directly through hooknotdigital.com.

CUSTOMISATION

- Free and paid theme setup
- Custom theme modification
- Login page and homepage branding
- Navigation and learner experience

LEARNING FEATURES

- SCORM, quizzes and assignments
- Certificates and course completion
- Progress tracking and feedback
- Cohorts, groups, roles and enrolment

ONGOING CONSULTANCY

- Monthly Moodle consulting
- Upgrades, migrations and server support
- Troubleshooting and platform rescue
- New feature development
